

## **Engineering Manager**

Singer Vehicle Design – **Sun Valley, CA**

### **About Us:**

Since 2008, boutique restoration house Singer Vehicle Design, based in Sun Valley, California, has been sharing its obsession to celebrate the Porsche 911 – and with more than 100 commissions globally delivered to date, that obsession has been mastered through the craftsmanship of its artisan team and the ability to envision its clients' desires to reimagine the ultimate bespoke air-cooled 911. Through the highest levels of creativity, performance, engineering and technology – and now, partnerships with iconic and globally recognized organizations like Williams Advanced Engineering -- Singer has become THE symbol of why “everything is important.”

This full-time position in our Sun Valley office, includes competitive vacation and health benefits.

### **JOB TITLE: Engineering Manager**

Singer Vehicle Design is looking for an Engineering Manager to provide leadership, direction, and development to a small team of engineers. The Engineering Manager will organize engineering resources effectively to meet company objectives and deliverables.

### **Core Requirements:**

- Applicants must be authorized to work in the United States
- Bachelor's Degree in Mechanical Engineering, Manufacturing Engineering, or similar field (Master's Degree in Engineering, Engineering Management, or MBA Preferred)
- **2+ years experience** managing a small team of engineers
- **7+ years experience** in engineering/manufacturing
- Knowledge and experience with a variety of manufacturing materials, processes, and technologies – prototyping, additive manufacturing, composites, machining, castings, stampings, fabricated assemblies, thermoforming, etc.
- Extensive experience in manufacturing facilities. Training in LEAN manufacturing principles and methodology
- Experience with program/project management
- Formal training and education in general management, operations, and/or supply chain management
- Experience with composites and composite tooling design and manufacture desired
- Experience in automotive manufacturing and assembly preferred

### **Specific Functions:**

- **Management of a small team of engineers, responsible for:**
  - Design and implementation of new and reengineered vehicle components, assemblies, and systems
  - Root cause analysis, issue containment, and engineering solution development for build and quality issues
  - Process engineering, development, improvement, and documentation
  - Engineering documentation creation and maintenance (CAD, drawings, specifications, work instructions, etc.)
  - Component make versus buy analysis and decision making
  - Tooling, jigs, and fixture development, purchase, and implementation
  - Capital equipment expenditure justification, purchase, commissioning
  - Technical support, troubleshooting, and assistance to other departments/groups – assembly, interiors, fabrication, electronics, etc.
- **Work cross functionally with other departments and managers to drive quality, throughput, and cost improvements in the vehicle assembly process**

### **Overall Work Characteristics:**

- Drive to be active and present on the shop floor, proven record of successfully engaging technicians
- Aptitude to interface with high level individuals, executives, company associates, and vendors
- Team oriented, strong ability to multi-task and work in a fast-paced environment and to multiple deadlines
- Extremely strong communication and interpersonal skills; both oral and written
- Strong organizational skills with the ability to prioritize effectively and efficiently
